# Grease Buster

**Mopping:** Add 4-12 ounces per gallon of water depending on soil type and concentration.

Mop from side to side in a figure eight pattern, overlapping each stroke as you move back and forth. Wring out mop thoroughly and pick up cleaning solution previously applied. Flush out mop and recharge cleaning solution as necessary.

Dispose of mop water into drains leading to grease trap.

**Auto Floor Scrubber:** Add 5-10 ounces (1:25 - 1:12) per gallon of water depending on soil type and concentration.

For best results, employ the double-scrub method.

On the first pass, apply solution and scrub without using the squeegee. For the second pass, continue scrubbing and use the squeegee and pick-up solution.

Dispose of scrubber water into drain leading to grease trap.

**Spray-N-Wipe:** Add 8-16 ounces (1:16 - 1:8) per gallon of water depending on soil type and concentration.

Spray the surface to be cleaned or spray the cloth or sponge with diluted or ready-to-use solution.

Wipe surface with a clean, damp cloth or rinse with water.

Allow surface to air dry.
